

Sarthak Sarikar

Pune, Maharashtra

+91-9307940002 | sarikarsarthak@gmail.com | Drive |

Profile Summary

A B. Tech student specializing in **Computer Engineering** with proficiency in Python, SQL, Power BI, and Machine Learning. Skilled in data analysis, dashboard development, algorithm design, and basic web development (HTML, CSS, JavaScript). Demonstrated ability to solve real-world problems using data-driven solutions. Passionate about building, NLP models, and business intelligence dashboards. Eager to secure a challenging role as a **Data Scientist, Machine Learning Engineer, Web Developer, or Business Analyst**.

Education

Vishwakarma Institute of Information Technology, Pune B.Tech in Computer Engineering — CGPA: 8.53	Aug 2022 – May 2026
Private Highschool and Junior college, Kolhapur HSC — 85.67%	2022
Vidyapeeth Highschool, Kolhapur SSC — 97.60%	2020

Projects

Safest Route Navigation for Women Security (Machine Learning + Map-based UI)	2025
- Built a women-safety focused navigation system that identifies crime hotspots using ML classifiers and suggests the safest path using the A* algorithm. - Integrated emergency SOS alerts to guardians and nearby police stations for real-time assistance. - Achieved 92.7% accuracy in crime-spot detection using a Gradient Boosting Classifier; deployed pathfinding based on crime severity.	
E-Commerce Analytics Dashboard (Power BI)	2024
- Designed a live sales & customer performance dashboard for Olist using Power BI with data preprocessing and schema modeling (Star Schema). - Delivered actionable insights through KPIs on revenue, product categories, customer behavior, and delivery performance using DAX.	
Timetable Automation System (UiPath + Google Calendar API)	2023 – 2024
- Automated extraction of timetable attachments from email using UiPath Studio, removing the need for manual search and downloading. - Synced timetable events directly to Google Calendar through API integration, enabling auto-updates with a single email verification step.	

Technical Skills

Programming:	Python, Java, C, SQL
Data Analysis:	Pandas, NumPy, Data Visualization, Power BI, Tableau, Excel
Machine Learning:	Scikit-learn, Model Evaluation, Feature Engineering
Tools & Platforms:	GitHub, VS Code, Google Colab

Certifications

- Microsoft Power BI Data Analyst Professional Certificate — Coursera
- UiPath Automation Developer Associate Training — Coursera (UiPath Studio)
- Data Processing and Visualisation by Accenture — NASSCOM
- Machine Learning in Python — Udemy

Achievements & Activities

- Smart India Hackathon 2024 organized by VIIT (Participation)
- Research paper on advanced gaming using eye gesture recognition
- Research on Safest Route Navigation with ML and A* Algorithm for Women security
- Served as a Student Representative for Three Years (2018-2020), NCC Cadet (2018-2020), Karate Black Belt
